## Technical Information

Can be stitched, tacked and glued. Cannot be heat welded

Bespoke colours can be produced subject to minimum quantity orders

Furnisoft can be colour co-ordinated with other Agua collections to produce stunning dual textured finishes

Please note that all fabric offered is subject to minor tolerance in respect of shade and other slight variations

Technical specifications may be amended, please check for the latest information.

Please ask if you require a sample of the current batch available but be aware that stock can move quickly.

## Fabric Care

Use a vacuum cleaner or soft brush to remove dust and solid particles.

Always try cleaning products on a hidden piece of fabric to test suitability.

Wipe frequently with a damp cloth to maintain the appearance of the fabric. Important to dry thoroughly after doing this.

All spillages should be removed immediately with a clean absorbent cloth.

Remove all stains immediately before they set.

Do not use marker pens on the back of the fabric.

Most stains can be removed using cold/warm water and a clean microfibre cloth, however poorly fixed clothing dyes or biro may cause permanent staining.

If soap based cleaners are used, all soap residues must be rinsed from the fabric.

Can be cleaned with mild Hypochlorite solutions (up to 10,000 ppm of available chlorine - including Haz Tabs and Chlor-Clean) or Mineral Spirit for infection control purposes.

Do not machine wash or dry clean.

Do not steam clean

Do not use: solvents, abrasives, chemical agents, waxes or polishes as this will damage the surface of the fabric.

Use cold water when treating stains caused by bodily fluids

Please refer to the Care Sheet on the Agua website for further details
